Würzburg, 09.02.2021

¹Dear Colleagues,

the following changes have been made to the risk assessments written in July / 2020 due to the current situation:

Since February 2nd, it has been mandatory to wear certified masks at all workplaces where distance and minimum area rules (1.5 m minimum distance and 10 m² per person) cannot be reliably observed.

A certified mask is a medical face mask or FFP2 mask.

The original ban on wearing such masks in the laboratory has therefore been lifted.¹

It is also mandatory to wear a certified mask on the outside area and on all traffic routes in the university buildings (corridors, toilets, stairwells, ...).

The basis for this are current letters from the Chancellor's office on the subject of workplace design and masks, which are stored on the OC website:

<https://www.chemie.uni-wuerzburg.de/oc/aktuelles/meldungen/single/news/verschaeefte-corona-regeln/>

Yours sincerely

Prof. Dr. Christoph Lambert

¹ Everyday or community masks made of fabric may only be worn on a voluntary basis at workplaces where there is no official mask requirement.
