

# Seminar in NLP (SS24)

**Parameter-Efficient Fine-Tuning in Natural Language Processing**

[Chair XII for Natural Language Processing](#)

Fabian David Schmidt

Benedikt Ebing

Prof. Dr. Goran Glavaš

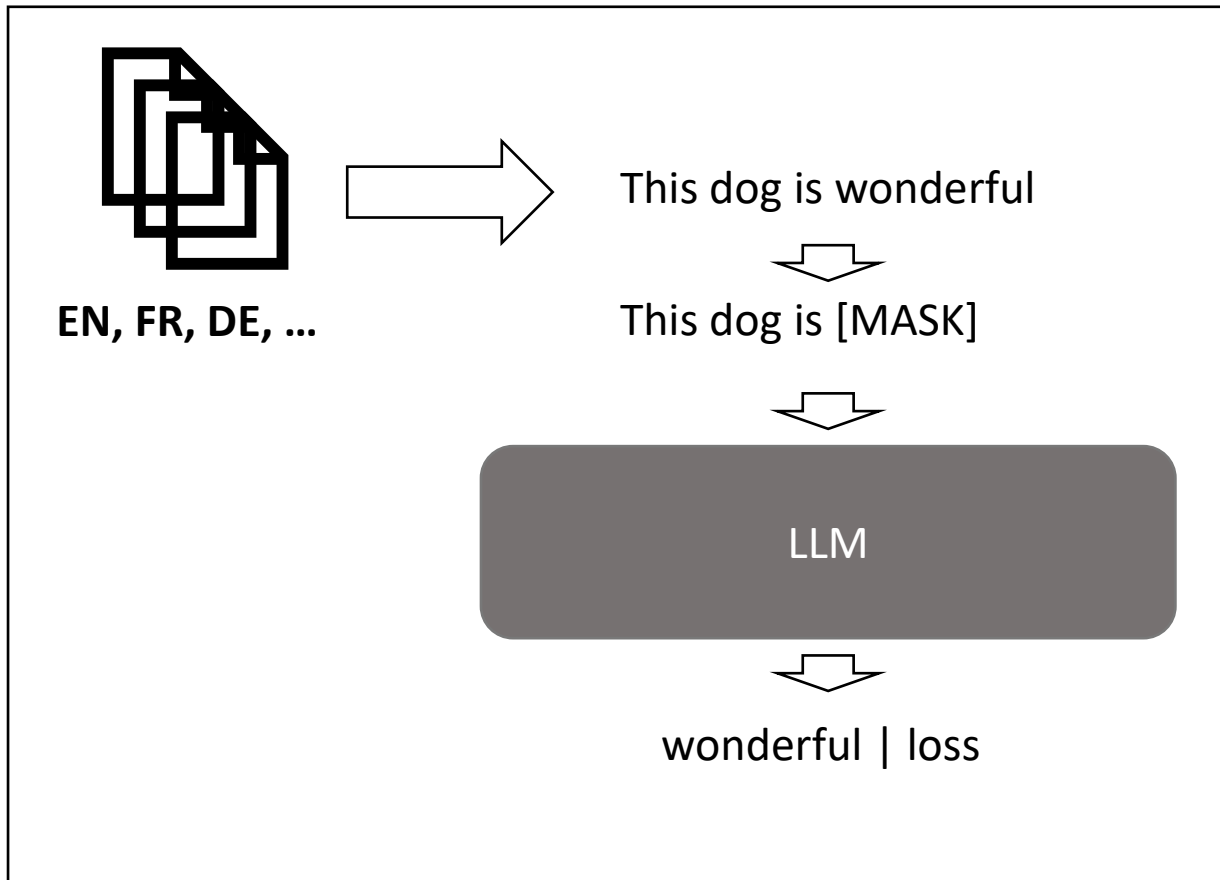

# How to handle ever growing models?

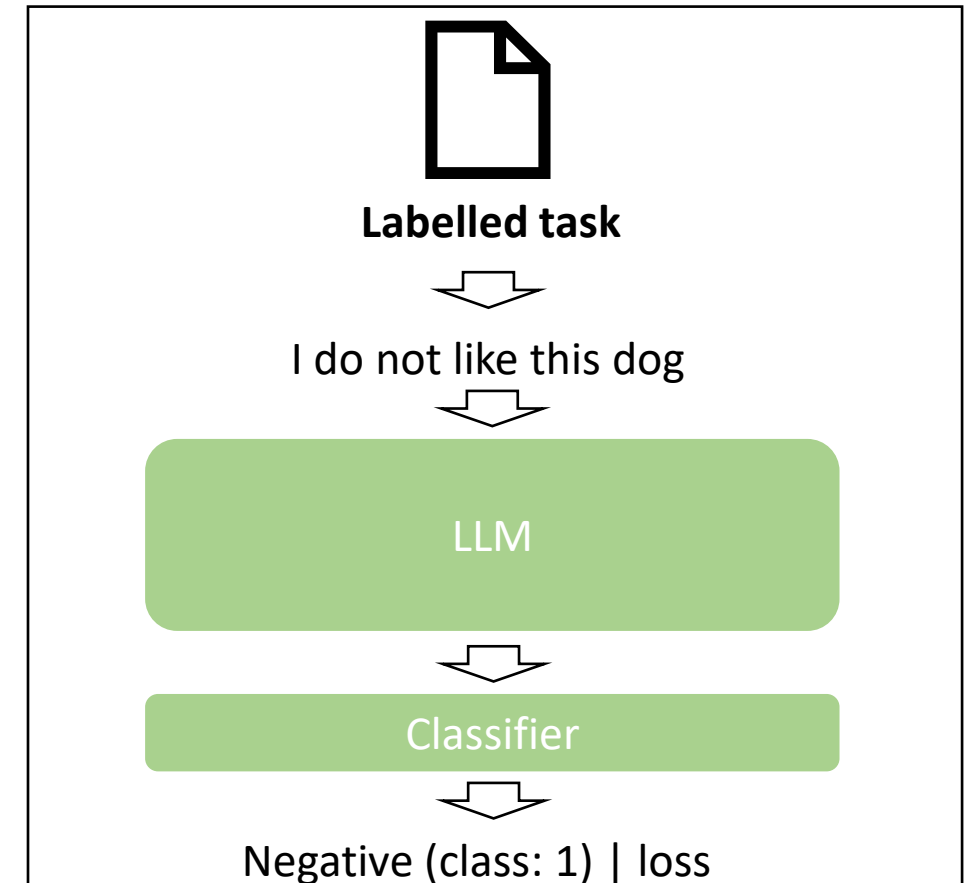

<https://huggingface.co/blog/large-language-models>

# Pretraining and fine-tuning with Large Language Model (LLMs)

## Pretraining

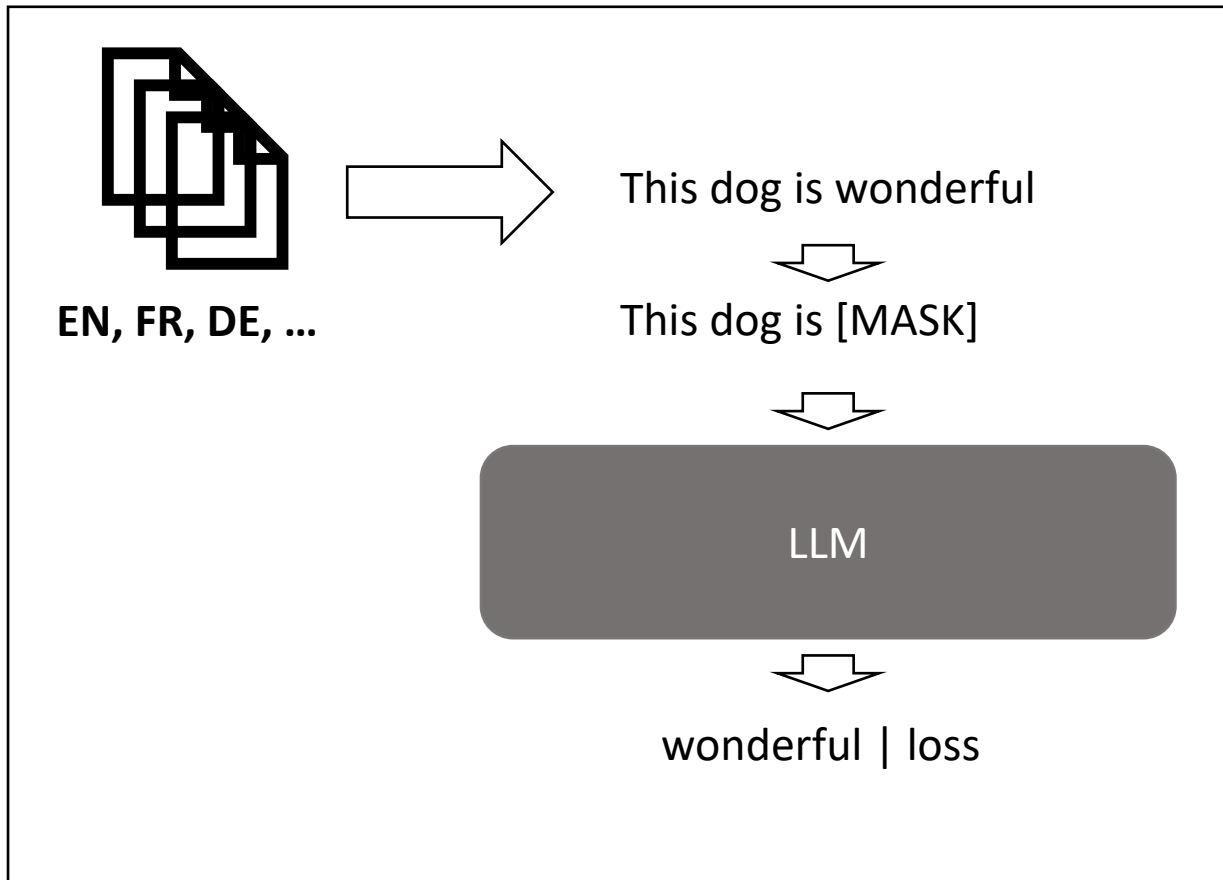

## Fine-Tuning

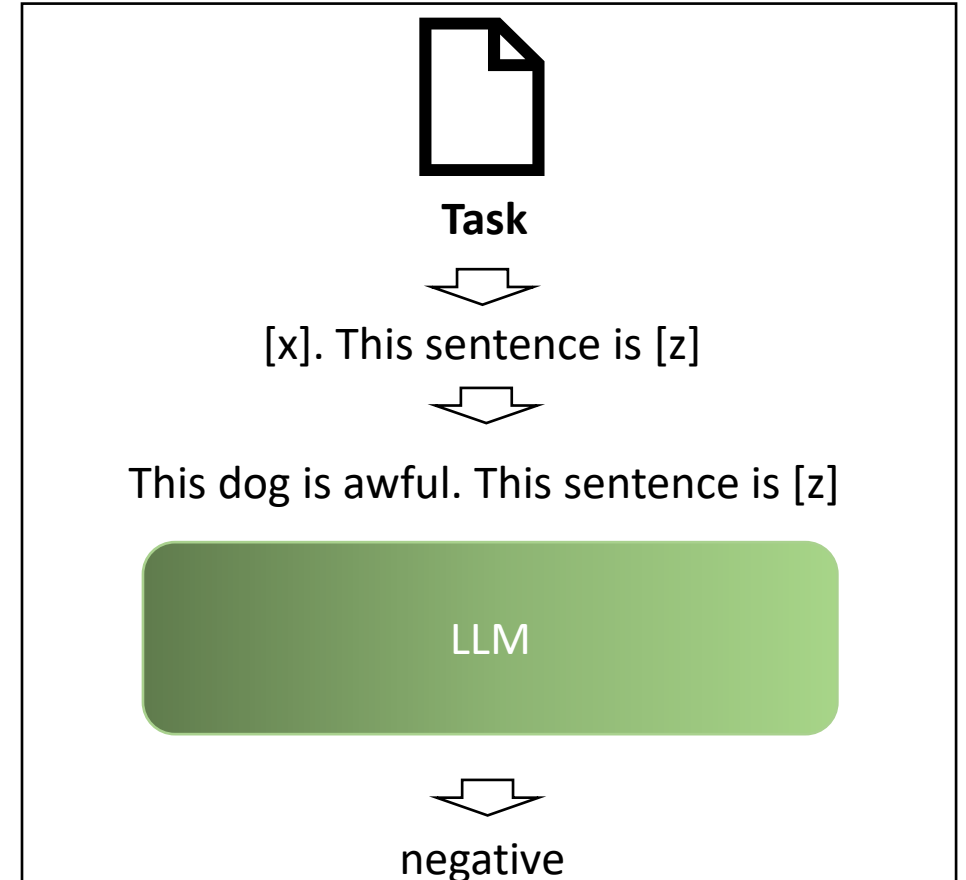

# Pretraining and prompting with LLMs

## Pretraining

## Prompting

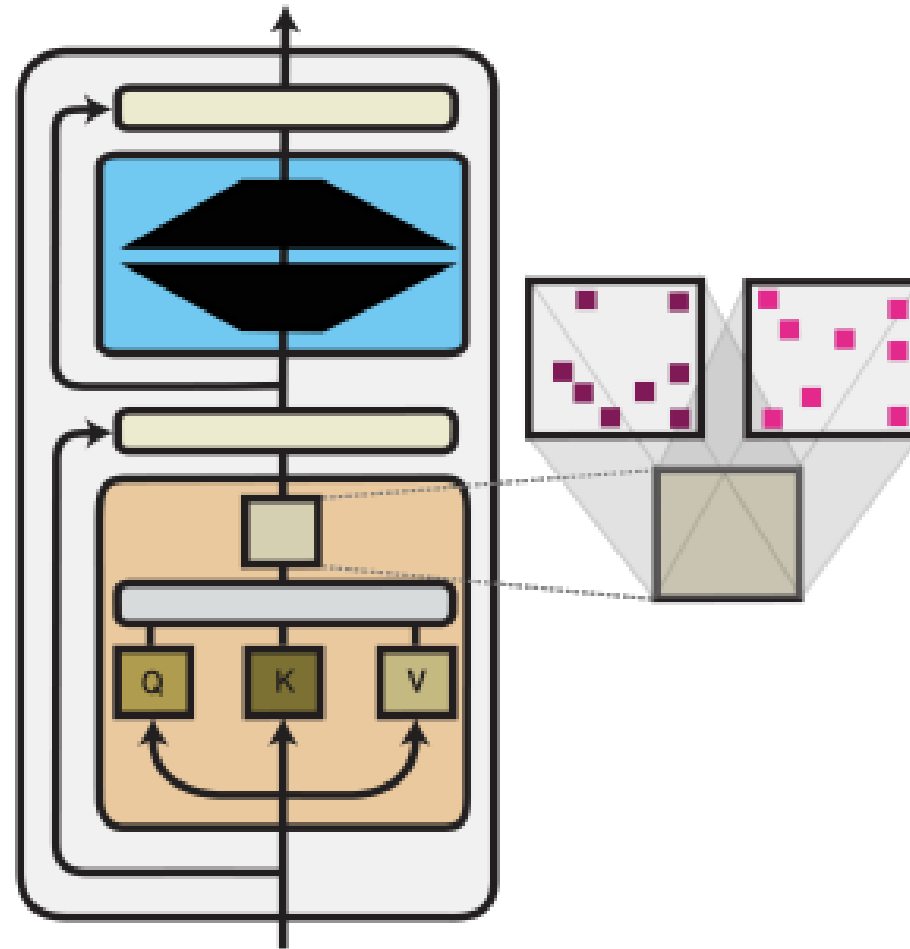

# How to adapt models in efficiently?

## Subtopics

- **Sparse Fine-Tuning**
- **Low-Rank Adaptation**
- **Adapters**
- **Soft-Prompting**
- **Hypernetworks**

# Sparse-Fine-Tuning

Source

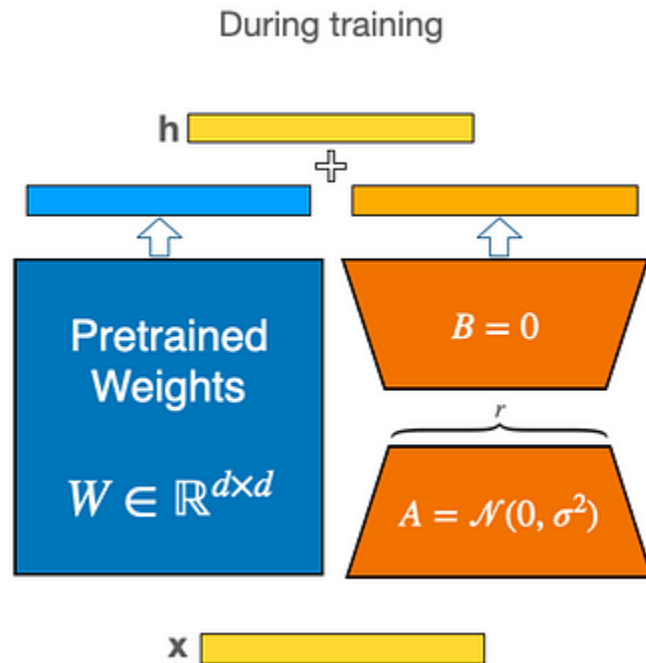

# Adapter

Source

# Low-Rank Adaptation

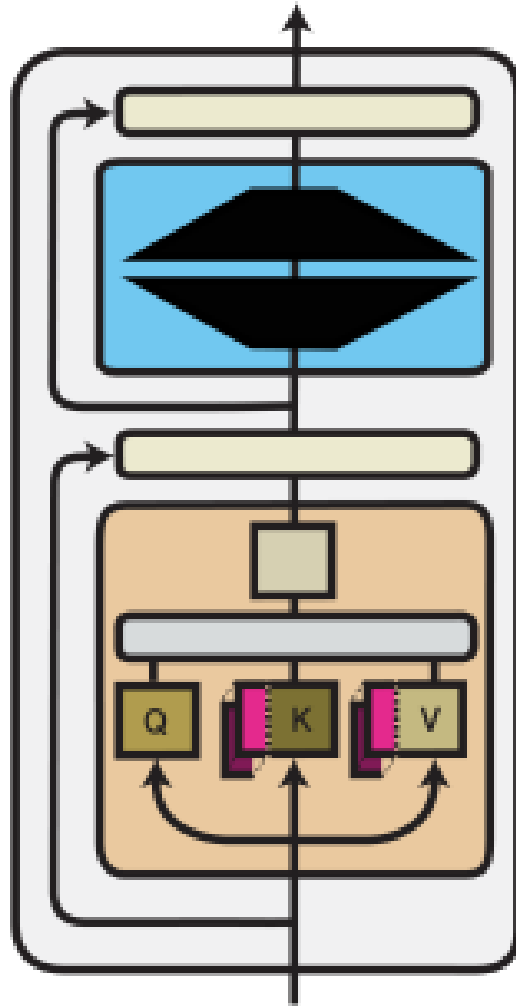

$$h = Wx + BAx$$

$$h = \underbrace{(W + BA)}_{W_{merged}}x$$

# Soft-Prompting

Source

# Hypernetwork

## Organization

- Assignment to a subtopic
  - Send us your first and second preference via email by 29.04.24 EoD to [benedikt.ebing@uni-wuerzburg.de](mailto:benedikt.ebing@uni-wuerzburg.de)
- Read, understand and explore subtopic
- Organize the collected knowledge for a meaningful presentation about your topic
  - **Mid-July**
- Summarize your topic in a concise report
  - **End of July**

# Expectations

- Provided papers are starting points into your topic
  - Explore: e.g., papers cited by or that are cited from the provided papers, survey papers, ...
- Summarize your topic including background information
  - Do not “sell” your topic or take statements for granted
  - Be critical and stay objective
- If unsure, ask us!

## Presentation

- 15 minutes
- What, why, and how
- 5 minutes Q&A
- Target audience: your fellow students

## Report

- [Use LaTeX template](#)
- 6 – 8 pages
- Use your own words
- Follow good scientific practice: e.g.,
  - Cite all related work, properly
  - Mark direct citations (if necessary)
- Target audience: as for the presentation

## Grading

- Report and presentation are similarly important
- Do not plagiarize!

## Additional Resources

- Survey on modular deep learning: „Pfeiffer, J., Ruder, S., Vulić, I., & Ponti, E. M. (2023). Modular deep learning.
  - <https://arxiv.org/pdf/2302.11529.pdf>
